SmartBorder Shipper/Client

To compete in this industry, you need to offer excellent service to your customers. This includes high-tech tools tailored made to your customers needs. That's where we come in.

SmartBorder Shipper empowers your customers to provide you shipment information and obtain tracking information whenever they need it.

Our Technology Solution

SmartBorder's SaaS-based shipper application allows your clients to login and manage their shipments through their dashboard, create and print documents, and research tariff numbers and ADD/CVD.

How You'll Benefit

- **Reduce costs.** Reduce data entry for your entry writers by downloading a customer-created proforma invoice to your entry.
- **Win more clients.** Clients love being able to see their entry status, product database, view and print their invoices and customs forms whenever they want.
- **Increase customer satisfaction.** Empower your customers by giving them powerful tools like the tariff picker and ADD/CVD query.
- **Save time for your customers and your staff.** Automate proforma information to be populated from a customers EDI feed or allow them to upload from Excel.

Key Features

- Customers can create proforma invoice, OGA forms, and manifest information
- Track CBP and FDA status
- View and print 7501, 3461, billing invoice, and imaged documents and files
- Proforma template capability that reduces redundant keying by automatically populating frequently used fields
- Data validation functionality, which ensures accurate data in every submission
- Tariff Picker searches tariff database and displays duty rates, special programs, and OGA flags
- Antidumping/Countervailing Duty (ADD/CVD) query quickly provides any relevant case data based on tariff number and country of origin
- EDI Integration from customer's applications (supporting files such as flatfile, x12, edifact, etc.)
- Manage client access levels and functions
- Pick-lists to automatically pull up a menu of your customers products, shippers, and consignees
- Automatic query of consignee Tax-IDs before the proforma is completed
- Direct connection to the CBP networks for quick queries and statuses
- Fully brandable for brokers, 3PLs and software resellers
- Unlimited user access from any computer with an internet connection
- Minimal internal IT support or investment

About SmartBorder

SmartBorder is a powerful, SaaS (also known as ASP) application that does one thing and does it better than any other solution on the market - it facilitates time-saving, Customs-compliant importation of goods into Canada and the United States.

SmartBorder not only meets the filing requirements, but also provides additional benefits to your cross-border shipping process. The SmartBorder suite of products fit your business needs, including full or partial EDI integration into your freight or ERP systems.

Contact us today to find out more about SmartBorder technology solutions or set up an online demo.
