

U.S. Customs and Border Protection

SCMProFit - Smartborder Synergy for US Logistics Industry

Increasing competition in the logistics industry is bringing about a corresponding increase in the complexity of its business processes too. Customers demand integrated solutions to ensure timely processing of data. At the same time, they would like to ensure that business processes do not take away the flexibility to be customizable to their requirements.

Some of the major challenges in US logistics market include:

- Need for integrating solutions with freight and customs
- Absence of an end-to-end domain expertise and knowledgeable customer support
- Need for a clear and focused roadmap with respect to specialization
- To be abreast of and updated with the latest compliance requirements (thus avoiding delays and penalties)
- Inadequate exception management capabilities

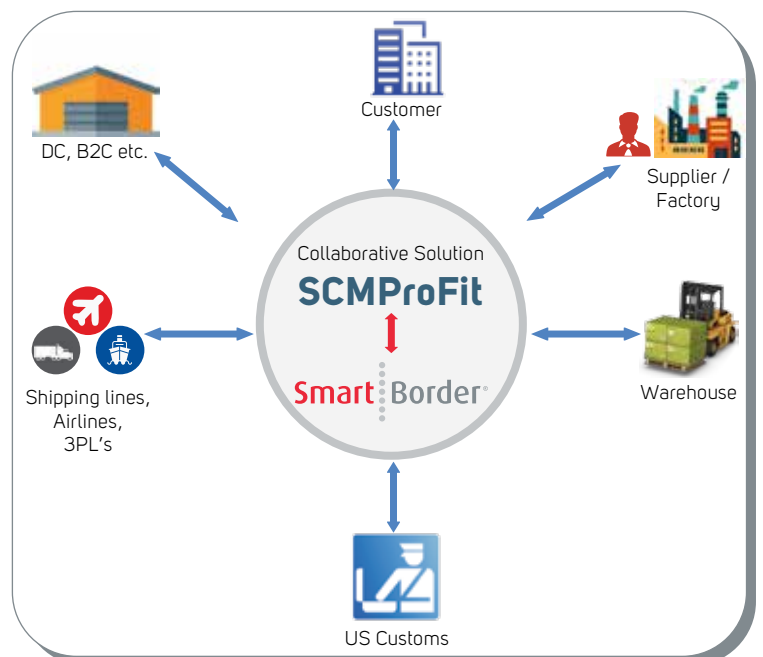

SCMProFit – Forging Synergy

SCMProFit is an organic purpose build solution to manage the end-to-end execution of an organization's logistics and supply chain processes.

In the U.S., freight forwarding is incomplete without customs. Our collaborative solution of SCMProFit & SmartBorder aims to provide end-to-end and niche solutions to the US logistics industry.

Hundreds of companies rely on SmartBorder (an established US Customs solution) to smooth the import process for almost every type of commodity. This collaborative solution can manage and diversify business for end-to-end Logistics business like Freight Forwarding, US Customs Clearance, Warehousing, Contract Logistics, and Project Logistics.

In short, a one stop solution for managing logistics execution.

Key Benefits

- Deep domain expertise in Logistics and Customs
- Knowledgeable support from industry experts including licensed customs brokers
- Single-point data entry - reduces paperwork and improves productivity
- Speedy turnaround times - in receiving customs declaration and status updates from customs
- Increased accuracy and reliability of customs processing
- Enhanced productivity
- Minimize number of IT systems deployed to connect to multiple customs authorities
- Flexible License model (SaaS & On-Premise Model)

Key Features

- Modular and integrated – Freight Management, Warehouse Management, Order Management, Customs Filing, Quote and Contract Management, Billing. This eliminates data re-entry in individual modules, thereby eliminating manual input errors.
